MEDICAL GEOGRAPHY

VOLUME 15D, 1981

LIST OF CONTENTS AND AUTHOR INDEX

PERGAMON PRESS

OXFORD · NEW YORK · TORONTO · PARIS
FRANKFURT · SYDNEY

N. Nihei, S. Asami and H. Tanaka: Geographical factors influencing the population numbers and distribution of *Oncomelania nosophora* and the subsequent effect on the control of schistosomiasis japonica in Japan 149

Hella Wellmer and Helmut J. Jusatz: Geoecological analysis of the spread of tick-borne encephalitis in Central Europe 159

Group F

Eiji Takahashi: Geographic distribution of cerebrovascular disease and environmental factors in Japan 163

H. Tamashiro, N. Enomoto, M. Minowa, S. Shibata, M. Ashizawa, I. Shigematsu and S. Anzai: Geographical distributions of cerebrocardiovascular diseases in Japan: 1969–1974 173

Akio Shimada, Sigetosi Kamiyama, João Antonio Neto Caminha and Yukio Moriguchi: Regional differences of death from chronic diseases in Rio Grande do Sul, Brazil from 1970 to 1976 187

Group G

G. Melvyn Howe: Mortality from selected malignant neoplasms in the British Isles: the spatial perspective 199

Jean-Pierre Thouez, Yves Beauchamp and Antoine Simard: Cancer and the physicochemical quality of drinking water in Quebec 213

M. Minowa, I. Shigematsu, M. Nagai and K. Fukutomi: Geographical distribution of lung cancer mortality and environmental factors in Japan 225

Yutaka Inaba, Haruo Yanai, Hirofumi Takagi and Shun-ichi Yamamoto: A study of the geographical pattern of cancer mortality for selected sites by means of factor analysis 233

N. Hayakawa and M. Kurihara: International comparison of trends in cancer mortality for selected sites 245

Yoshiyuki Ohno and Kunio Aoki: Cancer deaths by city and county in Japan (1969–1971): a test of significance for geographic clusters of disease 251

Number 2

Editorial Comment 259

John M. Hunter: Progress and concerns in the World Health Organization Onchocerciasis Control Program in West Africa 261

Robert M. Pierce: An ecological analysis of the socioeconomic status of women having abortions in Manhattan 277

Roger C. Grimson, Karen C. Wang and Paul W. C. Johnson: Searching for hierarchical clusters of disease: spatial patterns of sudden infant death syndrome 287

James E. DiLisio: Health manpower supply and demand: the case of a family practice residency program 295

William D. Bennett: A location–allocation approach to health care facility location: a study of the undoctored population in Lansing, Michigan 305

EDWARD M. BOSANAC and DAVID S. HALL: A small area profile system: its use in primary care resource development 313

Announcements i

Number 3

Editorial Comment 321

PAUL L. KNOX: Convergence and divergence in regional patterns of infant mortality in the United Kingdom from 1949–51 to 1970–72 323

JONATHAN D. MAYER: Geographical patterns of cardiac arrests: an exploratory model 329

LEN PAULOZZI: The seasonality of mortality in Alaska 335

FRANS W. A. VAN POPPEL: Regional mortality differences in Western Europe: a review of the situation in the seventies 341

ROSS MULLNER, CALVIN S. BYRE and JOSEPH D. KUBAL: Multihospital systems in the United States: a geographical overview 353

CHRISTOPHER J. SMITH and ROBERT Q. HANHAM: Deinstitutionalization of the mentally ill: a time path analysis of the American states, 1955–1975 361

JEAN-PIERRE THOUEZ, LOUIS MUNAN and IRADJ NABAHI: Factéurs associes avec l'utilisation des soins de santé en milieu rural 379

TOKIKO SATO, MASAKO SAKAMOTO-MOMIYAMA, KUNIE KATAYAMA, TAKESHI HIRAYAMA and JUICHIRO TAKEUCHI: Geographical studies of seasonality in cancer of the stomach 389

ALUN E. JOSEPH and JOHN L. BOECKH: Locational variation in mental health care utilization dependent upon diagnosis: a Canadian example 395

MICHAEL DEAR: Assigning service-dependent elderly to appropriate treatment settings 405

CONNIE WEIL: Classroom films for medical geography 417

MICHAEL KALISZER and MERVYN KIDD: Some factors affecting attendance at antenatal clinics 421

Aims and Scope

Social Science & Medicine was established to aid the dissemination of important research and theoretical work in all areas of common interest to the socio-behavioural sciences and medicine, including psychiatry and epidemiology. The Editors and the Publisher hope to encourage the exchange of ideas and information throughout the world among those engaged in different disciplines who are focusing their attention on aspects of the inter-relationships between the various branches of medicine and the social sciences. Papers will be published covering all those aspects of anthropology, economics, education, geography, psychology, social work and sociology which directly relate to any of the problems of mental and physical health, and all those aspects of medicine, including epidemiology, medical education and practice, psychiatry, public health and nursing which directly relate to any of the social sciences. The Editors invite for editorial review and rapid publication original reports of systematic studies and research in which at least one variable is concerned with medicine, medical education or medical services. They are equally interesting in receiving significant and relevant theoretical contributions. *Additional features* will include: book reviews, proceedings of symposia, monograph supplements, details of research (planned and in progress), correspondence and news.

Information for Contributors

Manuscripts for review (including long research reports) should be sent, in triplicate, directly to the Editor-in-Chief or to the relevant Senior Editor and will be published within six months (or less) of acceptance. Books for review should be sent to Dr Stoeckle. Inquiries regarding the publication of symposia should be sent to the Editor-in-Chief.

Style of Manuscript

General Form: Manuscripts should be typewritten on one side of the paper only, with double spacing and liberal margins. Manuscripts should be submitted *in triplicate*, i.e. an original and two carbon copies. The title of the paper and the author's name and address should be given on a covering sheet. The manuscript and diagrams will be discarded one month after publication unless the Publisher is requested to return the original material to the author.

Abstract: A short abstract (not exceeding 400 words) must accompany the manuscript on a separate sheet.

References: References should be cited in the text as consecutive, bracketed numerals and the list placed at the end of the article (not as footnotes on each page) in numerical sequence. The list should include the author's last name, initials, title of article in the original language, name of periodical abbreviated in the style of the *World List of Scientific Periodicals* (4th edition), with volume, page and year. For example:

1. Proshansky H. M., Ittelson W. and Rivlin L. G. Freedom of choice and behavior in a physical setting. In *Environmental Psychology: Man and His Physical Setting* (Edited by Proshansky H. M. *et al.*), p. 127. Holt, Rinehart & Winston, New York, 1970.
2. Willie C. V. The social class of patients that public health nurses prefer to serve. *Am. J. publ. Hlth* **50,** 1126, 1960.

Should the author be uncertain of the acceptable abbreviation he should quote the Publication name in full in the order and manner shown above in (2).

Illustrations: Illustrations and tables accompanying manuscripts should be numbered, provided with suitable legends, and marked lightly on the back with the author's name. Figures and tables may now be reproduced directly by photo-offset methods. For guidance on how best to prepare figures and tables suitable for direct reproduction, please consult the photoreprographic department of your institution which will give you assistance. Authors should indicate on the manuscript the appropriate positions of tables and text figures. A reasonable number of half-tone illustrations will be reproduced free of cost to the author, but special arrangements must be made with the Editor for colour plates, elaborate tables, or extra illustrations. Copy for line illustrations (such as pen drawings and charts) must be drawn and lettered in India ink, or black typewriter ribbon may be used for lettering. Should Greek letters or mathematical symbols be required in a table it is better, if you do not have the appropriate typewriter symbols, to indicate what is required in pencil in the margins rather than to write by hand onto copy which could otherwise be directly reproduced. Only good glossy photographic prints should be supplied for half-tone work: original drawings not photographs of them, should accompany the manuscripts.

Publication Languages: English, French, German or Spanish.

Refereeing Procedure

To ensure fairness, each manuscript will be assessed anonymously by at least two independent reviewers. Constructive criticism provided by the assessors will be forwarded to the author.

Reprints

Unless otherwise requested, each senior author will receive with his page proofs a reprint order form which should be completed and returned to the publisher with the proofs. The form may also be used to order copies of the issue at a specially reduced rate.
